

JIBS/Sherif Ovid Enhancement Meeting // 28th March 2018

Attendance: Delyth Morris (Cardiff University), Nicola Darlington (University of Nottingham), Karen Poole (King's College London), James Kenney (Ovid), Philip Marston (Ovid), Luke Britton Collert (Ovid), Tarja Huttunen (Ovid), Mauro Castillo Garcia-Maurino (Ovid),

Ovid updates:

- The main features launched last year as a result of user feedback were:
 - an edit search option
 - the ability to add notes to searches with the ability to export this to reference management software along with other bibliographic data
 - date range performance improvement
 - feedback link
 - Ovid Insights - access to Ovid articles via Google (not necessarily Scholar)
- Features currently under development:
 - disability access (UK compliance)
 - data protection
 - auto alerts performance
 - look and feel of Ovid platform
 - De-duplication
 - Ovid YouTube channel including quick videos

Ovid products discussed/updates:

- **Emcare**
 - Nursing and allied health database indexed with Emtree. Lots of sources not covered by Embase, Medline and CINAHL
- **Visible body**
 - Human anatomy atlas (app and desktop)
 - One off cost including unlimited app downloads as well as unlimited access to PC version. Validated by IP address. Download within IP range. 90 days revalidation. Can be extended to a year. Either IP revalidation (which will pick it up on iPad even if app isn't in use) or a code can be given
 - 2018 feature – augmented reality, gross anatomy lab and dissect tool
 - Whereas Acland is considered passive learning, Visible Body is designed for active learning
- **Ovid Nursing Edge**
 - New platform with preset package of nursing content. Can buy as a platform or as package of content. Hosted by Ovid Discovery.

- Ovid Nursing subject thesaurus – nursing and allied health subset of Medline and covers 300+ journals
- Compliant with mobile devices
- Includes Discovery Lite, Emcare, LWW journals, LWW books, nursing 2018 drug handbook. Provides centralised access to this content
- Autopredict based purely on nursing
- Single search across all nursing holdings
- Cross platform searching pulling together the most relevant nursing content
- PICO search function
- **Visual DX**
 - Diagnostic decision support tool
 - Point of care tool
 - App available
 - Further developing an app with image match, Dermexpert, which will be available for private users but not institutionally
 - Diagnosis tool rather than guideline/treatment tool such as UpToDate

Further discussions:

Data protection and compliance was raised and reassurance given that they are compliant with EU data protection.
